

Let us know : For Candidate's Application Form

Application Competency (add to application form, if possible)

	1 - No skills to 6 – very competent						
Program	1	2	3	4	5	6	Remarks, if any
Angular							
J2EE							
Hibernate							
Spring Boot							
Sprint framework							

Others (pls name) and also state your competency level (1-6)

To Do : Sample programming to complete with submission

In a party, there are X introverts, Y friends and Z gossipers.

- 1)The introverts will only talk to 1 other person (can be anyone) in the party.
- 2)The friends will talk with each other and any others who want to talk to them.
- 3)The gossipers will try to talk with everyone (including themselves) who would talk with them.

Write a program that will take 3 values. X, Y and Z, and it will compute both the minimum and the maximum number of conversations that would take place in the party.

State your assumptions if unclear.
